

# SOLUTION: Now Wh??e Could My Pipe Be?

This is a pipes puzzle, in which some of the squares must be rotated to create a fully connected network of pipes and ends.

Solving this puzzle requires rotating some, but not all of the squares. As hinted in the flavor, the pipe was “misplaced” “in the dark,” suggesting to extract using braille. Calling the rotated squares the dots in the traditional 3x2 Braille encoding, then going through the grid in reading order, yields the answer CAPILLARY.

**RED ARE ROTATED IN SOLUTION, THEN BRAILLE**
